ECOSYSTEM ACTION PLAN STUDENT ORGANIZER

Your assignment:

- Select a case study in which human behavior provides a direct threat to an ecosystem, throwing ecological relationships out of balance and putting one or more species at risk.
- Research the case using classroom and web-based resources.
- Based on your research, prepare a presentation for the class in which you describe the case study and suggest **THREE** possible actions that could be taken to restore the balance of the ecosystem.

*The presentation should address **all** of the following points:*

- 1) What is the threat to the ecosystem? Which species are at risk?*
- 2) What human action(s) are causing this threat?*
- 3) What are the possible consequences to at-risk species if nothing is done to address this problem?*
- 4) Suggest **THREE** possible actions that humans could take to restore the balance of the ecosystem.*
- 5) Suggest one concrete action that your class could take during this school year that would make an impact on this issue.*
