

# EGYPT'S GOLDEN EMPIRE

Name: \_\_\_\_\_

Date: \_\_\_\_\_

## Tombs and the Afterlife Project Guide

**Directions:** Using what you have learned from class discussion and viewing activities as well as your independent research, create a project that contains all of the elements described below. Choose a person from the list provided when designing your tomb.

I am designing a tomb for: \_\_\_\_\_ (choose from list below)

- a famous pharaoh like Ahmose, Tuthmosis III, Amenhotep III, Akenhaten, Ramesses II
- a famous woman of power like Hatshepsut, Tiy, Nefertiti, Nefertari
- an everyday person.

I will design my tomb by creating a \_\_\_\_\_ (choose one)

- three dimensional diorama or model that includes examples of how the tomb would be decorated, the items that would be included in the tomb, gods or goddesses that would be part of the tomb, and an explanation of the message that would be included to get this person to the afterlife.
- color drawing done on poster board that includes examples of how the tomb would be decorated, the items that would be included in the tomb, gods or goddesses that would be part of the tomb, and an explanation of the message that would be included to get this person to the afterlife.
- a multimedia presentation (such as Power Point) that includes at least one slide to address each of the following topics:
  - how the tomb would be decorated
  - the items that would be included in the tomb
  - gods or goddesses that would be part of the tomb
  - an explanation of the message that would be included to get this person to the afterlife.
- other: I have my own idea and it has been approved by my teacher.

# EGYPT'S GOLDEN EMPIRE

- With my project, I have included two to three written paragraphs that explain why I chose:
  - to decorate the tomb the way I did
  - specific items to be buried in the tomb with the deceased person
  - certain gods and goddesses to be a part of the tomb design
  - the message I did to ensure that the deceased would make it to the afterlife.
