

STRANGE DAYS ON PLANET EARTH: SEASON II

“Dirty Secrets”

Scientists and citizens across the world are scrambling to solve a set of disturbing mysteries unfolding along the shores of rivers, estuaries, islands and the sea. Striped bass are succumbing to flesh-eating bacteria in Chesapeake Bay. Majestic seabirds are starving in Hawai‘i. Coral reefs are weakening under a growing assault of invisible contaminants. Meanwhile, a known hormone-disrupting chemical is showing up in streams, rivers and other bodies of water across the nation, potentially jeopardizing the health of animals, including humans. These mysteries share a similar culprit. Each is linked to insidious hitchhikers silently riding the currents of the world’s water system. Something is amiss in our water supply, and experts are racing the clock to find clues and devise lasting solutions.
