

Diving into Research

You will be assigned one of the animals below to learn about. Your job is to research each animal to find out more about its behaviors. You should focus your research on the following:

- The animal's normal range and habitat.
- The animal's normal breeding season and breeding location.
- Whether the animal migrates, and, if so, its normal migratory route and season.
- How much time the animal spends in water versus on land.
- How quickly the animal swims and/or how far it tends to travel in a day.

Circle the animal you have been assigned and fill in the information you learn in each category listed on the right.

California Sea Lion

Gray Whale

Harbor Seal

Northern Elephant Seal

Northern Fur Seal
